■ STD9 power supply for manual guns

The STD 9 compact power supply transforms main alternating current into a variable direct current adjustable between 3V and 12V. It is designed to be used with KMP 3, KMV 3, KMX 3 and KMC3.

It has a built-in electronic system to ensure the safe operation of the spray gun. A switch in the power supply turns the voltage on when the gun is triggered and atomization air is flowing.

According to the current standards, this control box is classified as IP54. It has to be positionned in the ATEX safe zone.

ISOBUBBLE II

For water-based paints, the pump and paint should be isolated in an ISOBubble.

The ISOBubble II, with a compact design, can be installed near the working

area.
With a large sliding cover, it allows for fast and easy pressure adjustements and colour changes. A built-in safety device ensures the system is grounded when the gun is not triggered or if the cover is opened.

FEATURES	BENEFITS
	Compatible with a large range of pumps: PMP 150, 02.75, 15-C25, 20.25, 20.50, 17A2

■ STD9 B power supply for H2O manual guns

The STD 9 B compact power supply transforms main alternating current into a variable direct current adjustable between 3V and 8V. It has to be used with KMP 3 H2O, KMV 3 H2O, KMX 3 H2O and KMC 3 H2O. It has a built-in electronic system to ensure the safe operation of the spray gun. A switch in the power supply turns the voltage on when the gun is triggered and atomization air is flowing. According to the current standards, this control box is classified as IP54.

STD9 A power supply for automatic guns

The STD 9 A compact power supply transforms main alternating current into a variable direct current adjustable between 3V and 12V. It has to be used with the KAP 3, KAV 3, KAX 3 and KAC 3.

It has a built-in electronic system to ensure the safe operation of the spray gun.

A switch in the power supply turns the voltage on when the gun is triggered and atomization air is flowing. According to the current standards, this control box is classified as IP54.
