# Spray Guns A29 HTI & HPA

Universal gun suitable for a wide range of applications.  
Recommended for filled materials and high precision small output applications.

## High Transfer Innovation

High quality finish with high transfer efficiency

## High Power of Atomization

High quality finish with high power atomization

### FEATURES

### BENEFITS

High opening/closing frequency

Intensive production

Needle sealing done by a self-adjusting cartridge

Outstanding reliability

Independent fan and atomization control

Optimized finish quality and pattern size

New EN 3L aircap (HPA)

Unsurpassed wide fan pattern

Indexed aircap 0-90°

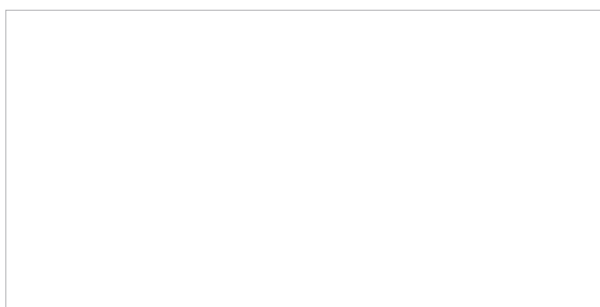

Perfect readjustment of fan pattern

Fluid output adjustment by indexed button

High precision fluid regulation

Optimized Inlet and outlet fluid ports

Optimum spraying of high viscosity materials (circulation recommended to keep product homogeneity)
