
The new General Catalogue for Fluid Materials is available !

Your new working tool

Customers/distributors benefits:

Our complete range of fluid materials on a single document
Global knowledge of our products and accessories
Rapid access to information – information regarding one equipment are on side to side pages – with a minimized error risk in the choice of part numbers (accessories and dedicated equipment are regrouped in the relevant spraying technology chapter).

The guide includes all our fluid product ranges:

Airspray spraying
Airmix® spraying
Airless spraying
Electrostatic guns and equipment
Pumps and 2 component machines
Fittings and air treatment.

It includes all equipment part numbers (except spare parts) available for sales. At the beginning of the document, tables give recommended equipment per market/application.

Each chapter structure has changed:

To facilitate the selection and choice of equipment by our customers, automatic guns, hot spraying, circulating, regulation, filtration, agitation and hoses have been split up into each spraying range thus minimizing errors in the choice of equipment (for example low pressure hoses for high pressure applications).

Each product data sheet content and presentation have changed:

The content: A preconisation

Of our 17 strategic markets (except for accessories)

Of the type of paint that can be used: water-based or solvent-based, primers, stains, high gloss, ...

has been done for each equipment.

Product files have been completed with part numbers most commonly ordered: for example for pumps, kits, carts, cups, suction and flushing rods.

The presentation :

Each file is presented with :

products data on 2 pages shown side to side for an easy reading (to prevent to turn pages)
different colors for each type of aircaps and projectors for those guns featuring 2 choices

NEW ! General catalogue - Fluid Materials (Interactive consultation)
